

GENERAL REQUIREMENTS FOR CARS AND DRIVERS

Schedule D - Apparel

1. The requirement for specified apparel for participants in motor sport is noted in NCR 141. These requirements vary in relation to the overall risk of the activity and, where appropriate, with regard to FIA and/or local civil authority regulations.

The tables below shall be used to determine the level and type of apparel required for a given event.

2. APPLICATION

The letters in the following tables represent the applicable standard as detailed in Article 3. These are referenced by apparel type and status of the competition.

The standards set out in this Article are the minimum requirement for the competition or activity listed.

The status of the application refers to the level of competition entered at a given meeting, not the status of the event/meeting.

A passenger in a vehicle shall be required to wear apparel as per the standard level for the activity.

Notes:

- NA = not applicable
- NR = no standing minimum requirement set by CAMS
- Any international competition listed on the FIA International Calendar will be subject to the standard of apparel detailed in the applicable FIA regulations and these will supersede the requirements set out below should a conflict exist.

2.1 RACE

	Automobile other than a Superkart					Superkarts					Private Practice	Demonstrations	Parades
	Club	Multi-Club	State	National	International	Club	Multi-Club	State	National	International

3. APPAREL STANDARDS

3.1 HELMET

A	As specified in FIA Technical List 25 (see www.fia.com):	
	FIA 8860-2010, 8860-2004	FIA standard
	Snell SAH 2010, SA2010, SA2005	USA standard
	Snell SA2000 (to be reclassified to Level B after 31/12/2014)	USA standard
	SFI 31.1/2005, 341.1/2010, 31.1A, 31.2A	USA standard
B	Level A	
	AS1698	Australian standard
	SFI 24.1 (youth helmet standard)	USA standard
	E22 (with 03, 04 or 05 amendments)	European standard
	BS 6658-85 Type A, A/FR	British standard
C	Full face helmet to:	
	Level A standard	
	Level B standard or	
	Snell M2000, M2005, M2010 (valid for Superkart competition only)	USA standard
D	Not mandatory	

3.2 FRONTAL HEAD RESTRAINT

A*	FIA 8858-2010 or 8858-2002 standard (see www.fia.com)
B	Not mandatory, Level A standard device highly recommended
C	Not mandatory, highly recommended where circumstances are appropriate
*	SFI Standard 38.1 only FHR devices shall also be recognised as an acceptable standard until 31/12/2015, after which the SFI Standard 38.1 only FHR shall no longer be recognised.

3.3 FLAME-RETARDANT OVERALLS / OTHER OUTERWEAR

A	FIA 8856-2000 standard (see www.fia.com)
B	Level A; FIA 1986
C	Level A; Level B; SFI 3.2A/1 (single layer) or superior SFI standard
D	Clothing from ankles to neck to wrists. Clothing of flammable synthetic material, such as nylon, is not acceptable. Level A, B or C overalls are recommended
E	A one- or two-piece abrasion-resistant 'race' suit which is securely fastened at the wrists and ankles, and also at the waist on a two-piece suit. The material may be leather, Cordura®, Cordulon® or equivalent. Some classes/groups may require a suit of leather
F	Minimum of short sleeve shirt/t shirt and short pants

3.4 FLAME-RETARDANT UNDERWEAR

A	FIA 8856-2000 standard (see www.fia.com)
B	Not mandatory; FIA-standard flame-retardant underwear is recommended
C	Not mandatory

3.5 FLAME-RETARDANT BALACLAVA

A	FIA 8856-2000 standard (see www.fia.com)
B	A Level A balaclava is required, except where the driver/co-driver is wearing a helmet to Level A standard. If a Level A helmet is worn, the wearing of a flame-retardant balaclava is not mandatory, but is recommended
C	Not mandatory; a motor sport standard balaclava is recommended
D	Not mandatory

3.6 FOOTWEAR

A	FIA 8856-2000 standard (see www.fia.com)
B	Level A or shoes with leather uppers that cover the foot. Shoes which have a leather upper but which include elasticised ankle regions are acceptable (eg, elastic-sided work boots)
C	Enclosed shoes
D	Abrasion-resistant footwear which covers and protects the ankles

continued ...

3.7 FLAME-RETARDANT SOCKS

A	FIA 8856-2000 standard (see www.fia.com)
B	Not mandatory; FIA-standard flame-retardant socks are strongly recommended
C	Not mandatory

3.8 GLOVES

A	FIA 8856-2000 standard (see www.fia.com)
B	Not mandatory; FIA-standard flame-retardant gloves are strongly recommended
C	Not mandatory
D	Abrasion-resistant gloves that cover and protect the hands and wrists (including the fingers)

4. FURTHER REQUIREMENTS

These requirements are in addition to the other Articles of Schedule D.

4.1 GENERAL

Each driver/competing crew member shall continue to comply with the requirement of NCR 141 until such time as they exit their automobile, or for rally/road events until the completion of a competitive section/stage – refer also to Article 2.2.

Apparel shall be worn as the manufacturer intended.

Individual category or event regulations may require higher standards of apparel than those detailed in Article 2. In such cases the higher standard shall apply.

4.2 BADGES AND EMBROIDERY

The attachment of badges and use of embroidery on competitor's overalls can have a detrimental effect on the protection afforded by the garment.

- (i) **Badges:** For apparel complying to the FIA 8856-2000 Standard, it is mandatory that all badges attached to the garment have a flame-resistant backing, and be attached only with flame-resistant thread to the outer layer of the garment only. For all garments the number and size of badges should be kept to the minimum required to meet commercial and regulatory obligations.
- (ii) **Embroidery:** For apparel complying to the FIA 8856-2000 Standard, it is mandatory that all embroidery be done using flame-resistant thread. Embroidery is only permitted to the outer layer of the garment. This is strongly recommended for all apparel.

4.3 HELMET REQUIREMENTS

- (a) **Style:** In addition to the helmets approved for use above, each helmet shall be one of the following design types; full face or open face. An open-faced helmet is defined as a helmet that, as a minimum, covers the hair line of the average person and includes covering the ears.

Specifically excluded are helmets that do not cover, when viewed in side elevation, the area from the top of the ear to the bottom of the jaw, commonly referred to as a 'skull cap' style.

- (b) **Modifications**

A helmet shall not be modified from its specification as manufactured except in compliance with instructions approved by the manufacturer and one of the standards organisations listed in this schedule, which certified the helmet concerned. Any item added or attached to a helmet by any means shall be considered as a modification. Any modifications or additions undertaken may invalidate the helmet certification.

Approved modifications may include:

- Painting or wrapping (vinyl sticker or similar) in compliance with the manufacturer's instructions which may require proof that it has been carried out accordingly.
- Adding or attaching of ducting for cooling purposes using components supplied by the manufacturer or in compliance with the manufacturer's instructions.
- Adding or attaching communication equipment using components supplied by the manufacturer or in compliance with the manufacturer's instructions.

- (c) **Frontal Head Restraints**

The drilling of holes in helmets for the fitment of FHR tether posts shall be undertaken only by the manufacturer of the helmet or an approved manufacturer's agent. Tether posts may be fitted to helmets that are pre-drilled in accordance with the FHR manufacturer's instructions.

Note: Decoration

Decoration of helmets is potentially dangerous, and members are warned of the hazard of using paint on approved helmets. Paint, stickers and transfers, or surface treatments can react with helmet shell material and affect its protective capacity; therefore, where a manufacturer provides guidelines or restrictions on the painting or decoration of helmets, these must be followed, using only paint or surface treatment specified by them (eg, air drying acrylic, polyurethane enamel or others) and preferably a painter having their approval. This is particularly important for injection-moulded shells which are not usually suitable for painting.

The shell being painted should be efficiently masked as paint penetrating the interior can affect the performance of the helmet liner.

Paints requiring heat curing should not be used and any process should not exceed the maximum temperature of conditioning of the helmet in the standard to which it is approved.

The manufacturer's instructions should also be consulted for any considerations on the use of stickers and transfers.

Accidents & Damage

Competitors are cautioned against using a helmet which has been damaged or involved in accident. Helmets shall be deemed by the Event Officials to be in a suitable condition for motor sport use.

4.4 GOGGLES & VISORS

Goggles or visors must be worn by drivers of open cars. Those with glass lenses of any kind are not acceptable. Lenses shall be of a plastic material, with high-impact resistance, satisfactory optical qualities and complying with Australian Standard Specification AS 1609-1981, BS4110Z or equivalent international standard.

Note: Goggles must be configured so as to minimise the entry of dust into the eye from any angle, and be positively retained by an elastic strap behind the head or helmet. Conventional-style glasses are not acceptable.

4.5 HEARING PROTECTION

It is recommended that hearing protection devices (eg, ear plugs) be worn at all times when exposed to high levels of noise.

4.6 PIT CREW APPAREL – CIRCUIT RACES

Each person working on automobiles in the pit or paddock area must at least wear shoes and socks, short pants and a short sleeved shirt. On race day, each pit crew must be neatly attired. The Organiser is authorised to refuse entry to the pit area of any person unsuitably attired.

In a circuit race where a refuelling operation is permitted, each person involved in such operation or who is working within one metre of the refuelling or venting point must be attired in the following:

- One-piece overalls of flame-resistant materials extending from neck to wrists to ankles. Where such overalls consist of a single layer of material, separate flame-resistant underwear extending from neck to wrists to ankles must also be worn.
- A flame-resistant balaclava which covers the entire head and neck save for one or two eye openings, unless a helmet providing a similar level of protection is worn.
- Goggles which cover all exposed areas of skin not covered by the balaclava, or a full-face helmet and visor.
- Shoes of leather or other flame-resistant materials which completely cover the feet and which fit closely around the ankle to minimise the ingress of spilt fuel. The soles must be resistant to fuel.
- Those directly handling fuel shall require socks and gloves which comply with the requirements of the FIA 1986 or 8856-2000 standard.

4.7 SUPERKART RACES AND PRACTICE

A superkart driver may wear appropriate wet weather clothing in addition to that specified.

4.8 MORATORIUMS

There shall be two years' notice on the implementation of any increased apparel requirements, save for any identified and pressing safety-related requirements which may arise or become evident, for non-international events.
